

Create an account in SendGrid:

The screenshot shows a web browser window with multiple tabs open: WhatsApp, SendGrid, Docker installation On Wi..., @M-Project-24569-1659..., Setting up Application En..., and Download file | Love... The address bar shows the URL `app.sendgrid.com/guide`. The SendGrid dashboard is displayed, featuring a left sidebar with navigation links: Dashboard, Email API, Marketing, Design Library, Stats, Activity, Suppressions, Settings, and Twilio SMS (marked as NEW). The main content area has a header 'Welcome, Rahitha!' and a sub-header 'To get up and running quickly, please follow the steps outlined below.' A blue banner reads 'Send your first emails with Twilio SendGrid'. Below this, the 'Create a sender identity' section explains that a sender identity is needed before sending email and offers two ways to create one: 'Create a Single Sender' (highlighted with a blue button) and 'Authenticate a domain instead' (a blue link). A note on the right states 'Your sender identity is the name your recipients will see in the "From" field of your emails' with a 'more about' link. At the bottom, a 'Send your first email' section is partially visible with the instruction 'Please create a sender identity before sending'. The Windows taskbar at the bottom shows the system clock at 12:42 PM on 10/26/2023 and several open applications including Docker Desktop, Word, and PDF files.

Rahitha Sriki

Welcome, Rahitha!

To get up and running quickly, please follow the steps outlined below.

Send your first emails with Twilio SendGrid

Create a sender identity

Before sending email, you'll need to create a sender identity. There are [two ways](#) to do this, but we recommend creating a Single Sender to get set up quickly and test your email integration.

[Create a Single Sender](#) [Authenticate a domain instead](#)

Your sender identity is the name your recipients will see in the "From" field of your emails. [more about](#)

Send your first email

Please create a sender identity before sending
